# Quick installation guide

**Air 7200I IP Set-Top Box**

## **Important Safety Instructions**

- Use the AC power adaptor provided with the product. Any other adaptor may damage the device. Such damage is not covered under the product warranty.
- Ethernet must be connected using CAT5 STP cable provided in the product box.
- Audio/video connection of the device must be established using the cables provided in the product box (HDMI or 3xRCA/SCART).
- USB connection should use a standard screened cable, max. length 1 meter. USB ports allow maximum 1A per USB port and 1.5A in total.
- Make sure the device is placed near the AC power socket. The power socket must be easily accessible.
- Use only the batteries indicated in this manual. Do not dispose of batteries in fire.

### **Check local regulations for possible special disposal instructions.**

- Never push objects of any kind into this product through the enclosure slots as they may touch voltage points or short out parts which could result in fire or electric shock.
- Never spill liquid of any kind on the product or use this product near water (such as near a bath or swimming pool, in a wet basement, etc.).
- Avoid using this product if there is a risk of lightning.
- Always disconnect the power cord from the wall outlet and disconnect any other cables before servicing this product. Under the following conditions, your product must be serviced by qualified service personnel:

When the power cord or plug is damaged or frayed.

- If the power cord or power plug is damaged or outworn.
- If liquid has spilled into the product.
- If the product has been exposed to rain or water
- If the product does not operate normally when the operating instructions are followed
- If the product has been dropped or hard cover has been damaged
- If the product exhibits a distinct change in performance, indicating a need for service

- 
- **IMPORTANT:** Remove the clear plastic protective cover on the device before turning on the device. Slots and openings on the top and at the bottom are provided for ventilation. To ensure reliable operation of the product and to protect it from overheating, these openings must not be blocked or covered. The product should never be placed near or over a radiator or heat register, or in a built-in installation unless proper ventilation is provided.
  - Unplug the device from the wall outlet before cleaning. Do not use liquid or aerosol cleaners. Use a slightly damp cloth for cleaning the device.
  - Please retain this manual for future reference.

## Your Air 7200I

AirTies Air 7200I is a state of the art IPTV set-top box that provides access to next generation interactive digital television services over a broadband IP connection.

The Air 7200I gives you access to Live TV Channels, Catch-up TV, some online video and radio applications on either your standard definition or high definition television.

The Airties 7200I was designed and developed for easy installation and usage. The following items are included in the box:

- This user manual
- 1 x Air 7200I IPTV set-top box
- 1 x Power Adaptor
- 1 x IR Remote control
- 2 x AAA Batteries
- 1 x 3xRCA/SCART Cable
- 1 x CAT5 STP Cable
- 1 x HDMI Cable

## Setting up a Wireless Connection

Your Air 7200I device can receive video transmissions over Wi-Fi eliminating the need to run Ethernet cables throughout your home. For wireless use, it is sufficient to attach a USB dongle to your device. If you do not have this feature on your unit, and would like to have it, please contact your service provider.

---

## Air 7200I Features

Please refer to the pictures below to familiarize yourself with the front and back panels of the device before connecting your Air 7200I to your television.

There is standby button on the front panel with dual-color LED. When device is not powered on, there will be no LED indication. When powered on, the LED color will turn blue. In standby mode, LED color will be red.

There are three LED indicators on the front panel. LED indicators, from left to right are: Network LED, HD LED and USB LED. If your Air7200I is connected to network and obtains an IP address, network LED will be on. If you are watching an HD video, the HD LED will be on. If you have a USB device connected to your unit the USB LED will be on.

Air 7200I is designed to be used horizontally. Vertical use or placing other items on top of the unit may block air circulation through the unit, and result in damage.

## Setup

You can setup your **Air 7200I** quickly and easily by following the steps below:

1. Place the batteries provided into the remote controller as shown inside the battery room.
2. Connect the audio/video outputs of the Air 7200I to the audio/video inputs of your television using either **3xRCA/SCART** or **HDMI** cable provided with the product. If your television has an **HDMI** video input, it would be best to use it since HDMI video output provides higher visual quality. High resolution video is only possible through the **HDMI** output.
3. Connect the Ethernet cable provided with the product to Air 7200I.

**Note:** If your unit is wireless, in other words if it works without the Ethernet cable, please go to the “Setting up a wireless connection” section.

4. Connect the power adaptor provided to the wall outlet and connect the other end to your Air 7200I.
5. On power up, it is possible that the device would check the network and upgrade its firmware to the latest version. In this case, the **Power LED** and **Network LED** would alternately blink. When the upgrade is finished, the device will automatically restart.
6. The “**POWER**” LED will light up indicating that the unit is now powered up and ready for operation.
7. In order to display the video from Air 7200I, you may need to change the settings on your television set so that its input matches to the television’s physical connection to the set-top box.

You should be able to select **Menu** options using your remote control.

When you press the “**POWER**” button on your remote control, the Air 7200I will go to standby mode.

For more information, please refer to section titled “**Using Your Air 7200I**”.

If you are facing any problems with your device please contact your Internet Service Provider.
